

# Lexmoto Michigan

➤ Stylish learner bike for less than £1500 ➤ Surprisingly practical too

**LEXMOTO ARE A** smart bunch. The Devon-based importers of Chinese scooters and small-capacity bikes sell thousands every year, at competitive prices. They're not some fly-by-night operation: they sell through a proper network of dealers, with the aftersales care that implies. They work closely with the factories to bring in machinery in line with UK tastes and expectations.

The Michigan is a cruiser-styled 125, and it's pretty good. It's fairly practical, with large mirrors, while the engine's balance shaft keeps vibration minimal. And those wide bars, and slightly forward footboards, mean it's roomy even for elderly porkers. **co**
